NOTES: 1. Amperage is for Aluminum using AC and pure tungsten or Mild & Stainless using DCSP and 2% thoriated tungsten. 2. All figures are approximate and for reference only.
 3. Reduce gas flow 10% when using a gas lens collet body. 4. Nozzle number X 1/16 equals size. (Example: #5 Nozzle = 5/16" orifice)

WARNING! PROTECT YOURSELF AND OTHERS. READ ALL THE SAFETY INSTRUCTIONS

SAFETY FIRST!

1. Read and understand your employer's & the equipment manufacturer's safety instructions.

2. Do not use this equipment if you are not properly trained.

3. Electrical shock can kill. Always disconnect power source before hooking up or changing electrodes, nozzles and parts.

4. Avoid breathing fumes and gases. They can be dangerous to your health. Always use adequate ventilation when welding or cutting.

5. ARC RAYS can injure eyes and burn skin. Wear welding helmet with the proper grade filter lens. Protect yourself and others from spatter and arc flash rays by using protective screens, barriers and welding curtains.

6. Noise can damage hearing. Wear proper ear protection.

7. Wear suitable nonflammable protective dry gloves and clothing to prevent arc and spatter burns.

8. Do not weld near degreasing or cleaning solvents. The heat of the arc can decompose solvent vapors to form toxic gases. Do not weld near flammable materials.

For more information on Health and Safety read: OSHA title 29 CRF 1910 Subpart Q; ANSI standard Z49.1, "Safety in Welding and Cutting" Available from the AWS, P.O. Box 351040, Miami, FL 33135; Canadian Standards Association W117.2 "Code For Safety in Welding and Cutting."

WARNING! - PROTECT YOURSELF AND OTHERS. READ ALL SAFETY PRECAUTIONS.

HOOK-UP INSTRUCTIONS

AIR COOLED - USING MACHINE GAS VALVE
ONE (1) PIECE POWER CABLE

AIR COOLED - USING MACHINE GAS VALVE
TWO (2) PIECE POWER CABLE

CAUTION: To avoid electrical shock, always turn power switch OFF prior to adjusting tungsten electrodes, Hook-up Kits or Extension Kits. Follow power supply manufacturer's instructions for connections of TIG torches and equipment.

HOOK-UP INSTRUCTIONS

AIR COOLED - USING TORCH GAS VALVE ONE (1) PIECE POWER CABLE

WATER COOLED - USING CITY WATER SUPPLY

*ITEMS INCLUDED IN HK-1 HOOK-UP KIT

AIR COOLED - USING TORCH GAS VALVE TWO (2) PIECE POWER CABLE

WATER COOLED - USING WATER CIRCULATOR

NOTE: TO AVOID DAMAGE TO CIRCULATION PUMP, DO NOT USE WATER SOLENOID VALVE ON MACHINE.

*ITEMS INCLUDED IN HK-1 HOOK-UP KIT

CAUTION: To avoid electrical shock, always turn power switch OFF prior to adjusting tungsten electrodes, Hook-up Kits or Extension Kits. Follow power supply manufacturer's instructions for connections of TIG torches and equipment.

CREATING A BETTER EXPERIENCE

Our Guarantee To You

Our mission at American Torch Tip is to create a better experience for our customers and the end users of our products. Creating a better experience is not just a tagline, it's at the heart of everything that we do.

— To that end, we commit to: —

Deliver The Greatest Possible Performance

We promise that all products manufactured by American Torch Tip will deliver the greatest possible performance for the operator. Offering six (6) welding and cutting platforms; we take our knowledge from each and use it to design the highest quality product.

Only Ship Products That Meet Our Standards

Our products are rigorously tested and inspected to meet high standards and ensure the highest quality.

100%

Always Do The Right Thing

We stand by our products with a 100% satisfaction guarantee. Should they not meet your expectations we will do what is in our power to make it right.

Ship In A Timely Manner

Any regular item we quote is available to ship within three (3) days unless otherwise stated. We have 6,000 items in stock and ready-to-order but also produce over 20,000 specialty and hard-to-find products every day.

THAT'S THE AMERICAN WAY

The American Way is symbolic of how we've done business as an American manufacturer since 1940. Treating our customers with the utmost respect and servicing their requests to the best of our abilities. Being a family owned company that creates domestic opportunities and employment for hard working Americans. Most of all, creating the best possible products that exceed the expectations of our customers.

TUNGSTEN ELECTRODES

TYPE	COLOR	SIZE	DESCRIPTION
2% Thoriated	Red	.020 x 7"	2% Thoriated tungsten contain a nominal 2 wt-% of thorium oxide (ThO ₂) that is evenly dispersed throughout the entire length of the tungsten. The most common type of electrode used today. Provides excellent resistance from weld pool contamination while at the same time offers the welder easier arc starting capabilities and a more stable arc. Generally used for DC electrode negative or straight polarity applications such as carbon & stainless steels, nickel alloys and titanium.
	Red	.040 x 7"	
	Red	1/16 x 7"	
	Red	3/32 x 7"	
	Red	1/8 x 7"	
	Red	5/32 x 7"	
Pure	Green	.020 x 7"	Pure tungsten contain a minimum of 99.5 wt-% tungsten with no other alloying elements. This allows the tip to form a clean, balled end which provides good stability on AC. Pure can be used with DC but does not compare with thoriated or ceriated as far as ease of arc starting. More susceptible to weld contaminations than thoriated, ceriated or lanthanated. Usually the least expensive of all tungsten, pure tungsten is generally used in the welding of aluminum and magnesium alloys (AC)
	Green	.040 x 7"	
	Green	1/16 x 7"	
	Green	3/32 x 7"	
	Green	1/8 x 7"	
	Green	5/32 x 7"	
2% Ceriated	Orange	.020 x 7"	2% ceriated tungsten contains a nominal 2 wt-% of cerium oxide (CeO ₂). Ceriated is different from the thoriated as it is not radioactive material. Also, the ceriated tungsten tends to last longer than thoriated and can be used proficiently with AC or DC. In manual applications the ceriated tungsten will provide slightly different electrical characteristics, than the thoriated tungsten but generally no difference will be seen by the operator. Generally used to weld carbon & stainless steels, nickel alloys and titanium.
	Orange	.040 x 7"	
	Orange	1/16 x 7"	
	Orange	3/32 x 7"	
	Orange	1/8 x 7"	
	Orange	5/32 x 7"	
1.5% Lanthanated	Gold	.020 x 7"	2% lanthanated or "rare earth" tungsten contain a nominal 2 wt-% lanthanum oxide (LaO ₃). This type of tungsten is very similar to ceriated as it too is a non radioactive material. Lanthanated electrodes operate at slightly different arc voltages than thoriated or ceriated electrodes. Were developed around the same time as ceriated tungsten to help combat the increasing awareness of the radioactivity of thoriated tungsten. Generally used to weld carbon & stainless steels, nickel alloys and titanium.
